“REACH FOR THE STARS”

July offers some of the best astronomy events of the year including the Venus ‘evening star’ and the Delta Aquariid Meteor Shower. We thought this would be a great time to read some science fiction books that focus on space! Here are just a few titles to get you started. Click on the covers to locate the ebooks on Project Gutenberg. Search [Librivox.org](https://www.librivox.org) for the audiobooks for all of the books except *Space Station 1*!

We also thought it would be fun while you are waiting for these astronomy events to occur to give you some space movies to view from the 1950s! Click on this link to [Young Library's Reach for the Stars Newsletter Playlist 2026](#) that will take you to YouTube for a collection of 14 space movies from this time frame. So even if you can't get to the beach this summer, we hope this will at least get you to the stars!

LIBRARY TECHNOLOGY HELPFUL HINTS:

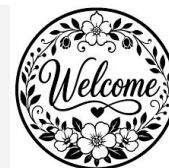

Watching the Night Sky Phone Apps

Stargazing is something almost everyone can do just by looking up at the sky at night. However, if you want to identify constellations that are above you, that may be a little more difficult. This article from Journey Home School Academy lists 5 free options of apps to help you identify objects in the night sky! [5 Best FREE Websites and Apps for Stargazing](#) Enjoy the stars!

Summer Reading Challenge Update!

Have you been reading?
Be sure to email us titles that you have completed to be entered! As of June 30th we have read 122 books & have 14 participants!

Welcome!

Welcome to our new Library Assistant, Maddie Tarleton, who started on July 1st! We encourage you to stop by and say hello to her!
